

Invitation

Third Announcement

Patient Empowerment: Responding to the NCD challenge

1st European Conference on Patient Empowerment
Copenhagen, 11th-12th April 2012

The Danish Committee for Health Education, Careum, WHO/Europe and European Network for Patient Empowerment invites you to engage in a two-day conference on the contribution of patient and citizen empowerment to the future of health and social care in Europe. Issues such as greater access to information and knowledge – increasing use of social media – experience with self-management programmes – the new legal requirements for patient involvement – the reorganization of health care systems – the availability of new technologies – all of these are creating a new dynamic through which patients and citizens are redefining their role in relation to health and social care. We believe this to be the critical shift towards building an approach to health and social care that is appropriate for the 21st century.

The conference takes place in Copenhagen and is being organized under the auspices of the Danish Presidency of the Council of the European Union – the Ministry of Health, the National Board of Health and in close technical collaboration with the WHO Regional Office for Europe.
